## DMX CONTROLLER VX01 SERIES

The VX01 DMX controller is the first controller specifically designed for architectural use with dynamic color changing fixtures, with a unique design, the VX01 seamlessly blends into any environment. Available in a basic version as a stand alone wallplate controller with a user friendly touch pad interface allowing the user to easily select color, saturation, and intensity, and also available in more advanced versions which include the user friendly software enabling dynamic shows to be selected from a vast library and also enabling the user to create fully custom content. The VX01 is the ideal control solution for small to medium size installations.
